SCOPRI LE NOVITÀ

L'arma vincente per ottenere grandi risultati è essere precursori dei tempi: i portoncini Ponzio Pannelline sono la prova. Precursore ed innovatore dei pannelli in alluminio, il marchio Plana apre le porte alla nuova stagione della casa con le esclusive novità dei portoncini d'ingresso che rendono il brand importante riferimento di stile e tendenze.

DISCOVER THE NEWS

The winning weapon to get great results is to be precursors of the times: Ponzio Doors are the proof. Precursor and innovator of aluminum panels market, the brand Plana opens the doors to the new home season with unique innovations of the doors that make the brand more and more a reference of style and trends.

L'AZIENDA

Ponzio è un'azienda leader da oltre 70 anni nella produzione e progettazione di sistemi in alluminio ad alta efficienza energetica per l'architettura contemporanea, con particolare attenzione alle finiture superficiali, di cui offre un'ampia gamma tecnologicamente avanzata.

Prestazioni impeccabili, design esclusivo e altissima affidabilità dei suoi prodotti - facciate, finestre, porte e sistemi frame less - fanno di Ponzio un partner di riferimento capace di soddisfare appieno le esigenze sia del progettista che del cliente. Tutto sostenuto da costanti investimenti in ricerca, tecnologia, innovazione e creatività: per ottenere risultati eccellenti e mantenere posizioni di leadership nel mercato. Nell'ultimo decennio, inoltre, è cresciuta molto anche la dimensione internazionale dell'azienda, con l'apertura di nuovi mercati come quello asiatico, sudamericano, africano e nordest europeo. La costante attenzione di Ponzio verso la qualità, l'ambiente e la sicurezza, ha portato l'azienda ad associarsi al GBC Italia che persegue lo sviluppo e l'adattamento del marchio LEED alla realtà italiana.

THE COMPANY

For more than 70 years Ponzio has been a market leader in the production and design of high-energy-efficiency aluminium systems for contemporary architecture (curtain wall, doors and frame less systems).

Ponzio offers a wide range of high quality surface finishes with particular attention to technologically advanced products. The company constantly invests in research, technology, innovation and creativity to attain excellence and maintain its leadership in the market. Moreover, in the last ten years the company has grown internationally by conquering new markets including Northern Europe, Africa, South America and Asia. The constant attention of Ponzio to quality, the environment and safety have led Ponzio to become a member of GBC Italy which pursues the development and adaptation of the LEED trademark in Italy.

I PORTONCINI "LAVORATI" IN CASA: DALLA PROGETTAZIONE ALLA PRODUZIONE

Made in Ponzio: è questo il grande valore dei portoncini d'ingresso Plana, progettati e prodotti direttamente a "casa" Ponzio.

Nel 1941, da un'intuizione di Giuseppe Ponzio, nasce l'azienda omonima specializzata nel trattamento superficiale dell'alluminio. In questi oltre 70 anni di attività, Ponzio si è conquistata a ragione il titolo di leader assoluta nella progettazione, produzione e innovazione dei sistemi in alluminio per l'architettura con una filosofia aziendale orientata alla ricerca tecnologica, all'innovazione e alla fornitura del servizio, oltre che del prodotto. I portoncini Plana sono frutto di esperienza e capacità ma anche di studio continuo, oltre che di lungimiranti piani di investimento. È nato così lo stabilimento di produzione Plana, fiore all'occhiello del quartier generale Ponzio: oltre 60mila metri quadrati coperti nella zona industriale di Pineto.

THE "HOMEMADE" DOORS: FROM DESIGN TO MANUFACTURING

Made in Ponzio: this is the great value of the entry Plana doors, directly designed and produced at Ponzio "home".

In 1941, Giuseppe Ponzio founded the eponymous company specializing in the surface treatment of aluminum. In these 70 years of activity, Ponzio has earned the title of the absolute leader in the design, manufacture and innovation of aluminum systems for architecture with a corporate philosophy oriented to technological research, innovation and service, over that of the product. The doors Plana are the result of experience and ability but also of ongoing study, as well as forward-looking investment plans. So it is born the factory of Plana in the Ponzio headquarters: over 60 thousand square meters covered in the industrial area of Pineto.

SINCERT

H.I.+*: IL PRIMO PANNELLO CON DOPPIA ANIMA

Plana è la materializzazione del concetto di innovazione nel mondo dei portoncini d'ingresso: il primo pannello con doppia anima flessibile (versione da 40 mm). Il massimo delle prestazioni: è questo il must che rende Plana unico nel suo genere. Da oggi, infatti, con la nuova tecnologia e l'inserimento della doppia anima flessibile, oltre a migliorare incredibilmente le prestazioni, questo prodotto innovativo sul mercato consente di controllare la dilatazione termica derivante dall'irraggiamento nella parte esterna. Inoltre, grazie all'inserimento della seconda anima flessibile, permette di controllare la dilatazione interna dovuta alla forte escursione termica tra la temperatura interna (ambiente riscaldato) e la temperatura esterna, soprattutto nei periodi invernali e in zone con forte escursione tra giorno e notte.

H.I.+*: THE FIRST DOUBLE CORE PANEL

Plana shows the materialization of the innovation concept in the front-door market. It represents the first double core panel (40 mm thickness) which just gets the best performances: this is the "MUST" that makes Plana unique on its kind. Its new technology and its flexible double core enhance its own performances and allows a better control of the thermal expansion due to the sunlight irradiation of its outward side. Furthermore, the inward side expansion, due to the thermal difference between outside and inside temperature, mainly during winter time and in particular areas with high day-night temperature excursion, can be controlled thanks to the second flexible core.

**IL PANNELLO DALLE
GRANDI PRESTAZIONI**

- maggiore controllo della dilatazione termica derivante dall'irraggiamento nella parte esterna;
- maggiore controllo della dilatazione interna dovuto alla forte escursione termica tra la temperatura interna ed esterna nei periodi invernali e in zone con forte escursione tra giorno e notte;
- prestazioni superiori.

GAMMA IN T.H.F.

La composizione del pannello Plana fa un salto in avanti e presenta un nuovo materiale, il T.H.F. in fibra naturale. Un incredibile risultato di studi e implementazioni tecnologiche che oltre a migliorare i materiali del portoncino Plana, garantisce la massima lavorabilità del prodotto, planarità delle superfici ed incredibile resistenza ed elasticità. Inoltre la composizione in multistrati permette il fissaggio degli accessori in ogni punto del pannello.

T.H.F. PANEL

Plana's panel composition steps forward and introduces a new material: the natural fiber T.H.F. It represents an outstanding outcome of research and technologic implementations that improves the composition of the Plana doors and guarantees the maximum product workability, the surface planarity and an exceptional strength and flexibility. Moreover the multilayer panel composition grants the full surface availability for accessories installation.

INSERTI IN ALLUMINIO: IL CUORE DELLA COLLEZIONE

Come Plana nessuno mai. Potrebbe essere questo lo spot per sintetizzare l'unicità della collezione del programma Ponzio Pannelli, che oltre alla doppia anima, hanno un cuore grande. Grande come l'impegno del team di lavoro a studiare e trovare il sistema per poter connettere diverse lamiera fra loro, mantenendo la perfetta planarità della superficie esterna e valorizzando il tutto con un inserto in alluminio. Solo noi, in esclusiva per il portoncino Plana, abbiamo creato uno speciale profilo in alluminio estruso. Ne è nato anche un brevetto di invenzione che tutela questo innovativo sistema di unione lamiera/profilo.

E non ci siamo fermati qui: chi sceglie Plana avrà la possibilità di personalizzare al massimo la propria porta e di scegliere anche il tipo di inserto a vista se 10 o 2 mm e la relativa finitura.

ALLUMINIUM INSERTS: THE COLLECTION'S HEART

Nothing as Plana has never seen before. It might be the commercial advertising launching the Ponzio Pannelli's collection program that, apart from the double core, put its great Heart into work. Great as the strengths of the Ponzio team focusing on the research of the best solutions that allows the connection between the panels, keeping the perfect planarity of the outside panel, enhanced with a special aluminum insert developed and patented for PLANA.

That's not all: Plana can be highly customized by choosing from the range of the aluminum insert decoration (from 10 to 2 mm thickness) and the several coatings.

I COLORI PER LA TUA CASA: UN'ESCLUSIVA PONZIO

Starox, Braised, Uberall sono le finiture superficiali del futuro che segnano un punto di svolta nel processo di colorazione dell'alluminio. Starox è la finitura dell'alluminio anodizzato colorato nelle due varianti di lucido e opaco. Braised è l'anodizzato graffiato, colorato. Le lavorazioni Uberall sanciscono poi la leadership di Ponizio in know-how e tecnologia. I nuovi impianti di verniciatura verticale e orizzontale con cambio colore rapido imprimono una gamma di colori brillanti e lucidi all'alluminio per un effetto finale mai visto prima. Le finiture Ponizio sono la risposta più efficace al desiderio di raffinata eleganza in casa.

THE COLOURS FOR YOUR HOME: A PONZIO EXCLUSIVE

Starox, Braised, Uberall are the finished surfaces of the future which mark a turning point in the aluminium colouring process. Starox is the new finish for coloured, anodised aluminium and is available in bright or matt. Braised is anodised, scratched, coloured. Uberall treatment are the demonstrations of Ponizio's expertise in know-how and technology. The new vertical and horizontal painting machines can rapidly be changed from one colour to another giving a wide range of bright colours to the aluminium, allowing a colour quality never seen before. The Ponizio finished surfaces are the most effective reply to the desire of refined elegance at home.
